The products are made of high-graded plastic. The bins are thick and the surface is smooth, easy cleaning. The products have a beautiful appearance and are durable. The heavy-load foot wheels are made of pure rubber, being light and making no noise. The wheels are embedded in the bin, so they never get off and can easily get over stairs and curbs. The one-piece structure makes it remarkably strong and durable. They are suitable for collecting garbage in public sites or for material.
